

YUCHAI HYDRAULIC EXCAVATOR

RELIABLE AND PROFESSIONAL

T op-class hydraulic system >>

World-brand hydraulic system including original imported pump, main control, traveling motor, slewing motor and various pilot control valves.

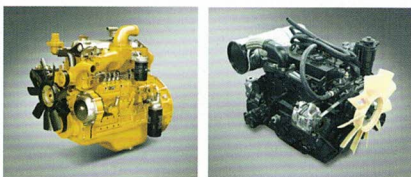

S trengthen digging bucket >>

Bucket with Scleroses connecting holes has improved the wearability of the centre hole, buckets made by strengthen steel plate, all important positions which the bucket connecting with the arm are all strengthen by high intensity steel plate.

P owerful engine system >>

Equipped with powerful perkins/Kubota/Cummins/Yuchai engine provide excellent work efficiency and capacity under any operating environment.

◀ C omfortable cab

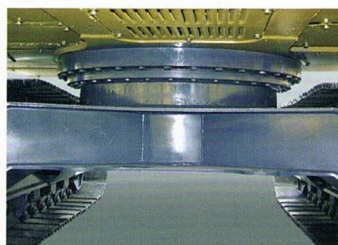

New style cabin with expanse operating area, all the control element are designed and installed as the latest ergonomics, with air condition for satisfying all seasons operation environment, advanced LCD instrument can supply the electronic monitoring and alarm for machine system, adjustable arm rest and driver seat not only supply convenient operating but also mitigating fatigue, largo windshield supply spacious view.

All operating mechanisms are designed and allocated according to the latest ergonomic research achievements. It is of powerful strength and rigidity and unique reverse function, which makes repair and maintenance more convenient.

◀ R eliable traveling devices

High intensity track and protecting frame can keep the track in the correct position under any operation environment.

Strengthen Chassis is welded by low stress and high intensity steel plate, high intensity steel tracks can support the machine travelling on the rough ground and endure the impact when operating in wetlands.
