BUCKET
THUMB.

A THUMB FOR EVERY APPLICATION

ONE OF THESE THUMBS IS RIGHT FOR YOU

BTH Stick Mounted Hydraulic Thumb

BT-H Hydraulic Thumbs have been the thumb of choice for thousands of contractors. They deliver more value than any other thumb. The positive three-point grip is just like picking up something with your thumb and first two fingers. The narrow design keeps thumb weight to a minimum for greater lift capacity.

SEVERAL BTH FEATURES:

- Instant deployment, storage.
- Narrow design provides fast, positive, three-point grip on loads of all sizes.
- When retracted, the narrow profile is a big plus for close work.
- Narrow profile means less thumb weight and more load capacity.
- Cylinder rod protection eliminates rod damage.
- Lower cost than most other hydraulic thumbs.
- Patented Thumb Lock eliminates down drift. The thumb locks under the stick and is automatically released when needed.

BTH-W Stick Mounted Wide Hydraulic Thumb

Some applications such as raking or combing small debris into the bucket require a wide thumb. Rockland BTH-W Stick Mounted Wide Hydraulic Thumbs have the same quality features as BTH Stick Mounted Hydraulic Thumbs, plus a rugged, anti-torque design that guarantees years of dependable, trouble-free service. If your application calls for a wide thumb, remember **ONLY** Rockland wide thumbs have a thumb lock and a cylinder rod guard.

Wide or narrow, you simply can't do better than a Rockland Stick Mounted Hydraulic Thumb!
